

ALL-PRO 3 SELF PROPELLED FIELD MARKER

by Newstripe, Inc

Totally redesigned from the ground up!

The **All-Pro 3** is lighter, more compact and even more rugged than the original **All-Pro**.

The **All-Pro 3** features;

- 12 gallon pressurized tank with continuous paint agitation that keeps paint mixed.
- Large in-line filter plus nozzle screens keep you striping and not stopping to clear clogs.
- 2"-6" Bi-directional spray head for one pass striping
- Variable speed traction drive for simple operation
- Dependable cast iron piston compressor
- Qwik-Lock™ spray trigger for hands free striping.
- Side outlet at bottom of tank with E-Z clean drain hose.

SPECIFICATIONS

All-Pro 3 Self-Propelled Part # 10003663

DIMENSIONS: 59"l x 30"w x 38"h

AVAILABLE OPTIONS

Hashmark-Master - Easily paint hash marks five times faster than other methods. Eliminates repeated measuring or using stencils and templates that require a two or three man crew.

The **Hashmark-Master** quickly attaches to any Newstripe field marking machine. The operator follows the automatic line-up guide from one hash mark to the next, paints it and moves on. It is that simple. Your hash marks will be perfectly laid out and painted every time. The **Hashmark-Master** will easily pay for itself during the first football season.

Part # 1000892

PerfectCircle - Paint absolutely perfect circles and arcs easier and faster than ever before. The spray head's unique spring-loaded feature precisely and automatically guides the paint machine in a perfect circle. Locate the center of the circle or arc to be painted and push the pivot point into the ground. Attach the lightweight aircraft cable between the spray head and the pivot point. Then, simply push the machine and let the **PerfectCircle** do the work of guiding the field marker.

Part # 1001656

Rear Swivel Caster - Fifth wheel swivel caster for arcs and circles. Easily bolts on any Newstripe machine. Simple drop down latch raises rear wheels to paint circles and arcs, lifts and locks in up position to paint straight lines.

Part # 1001231

Hand Gun Kit: Part - Low-pressure handgun with 12' hose and 24" wand extension for painting field markings or stencils. Comfortable pistol grip with in-line strainer to prevent clogging.

Part # 1000201

NSF Funnel - No Spill Funnel. Quick, clean paint tank filling with no spilling of paint. Unique design eliminates splashing and supports a 5 gallon pail lip while pouring. Plus, it covers gauges and controls.
