

Field Marking

MarkSmart™ Field Marking Systems from Markers, Inc.

Here is a step-by-step guide to eliminate repeated measuring and staking. From now on, just connect the dots.

1 Drive installation tool into ground with hammer at starting point.

2 Place ground socket into hole.

3 Insert socket setter into ground socket.

4 Using rubber mallet or hammer, tap socket setter until ground socket is at turf surface.

SAFETY: Inground products are made of soft pliable polymers. Above ground products won't crack, splinter or have sharp edges. Exclusive "Hide-away" spike stores inside poles when not in use.

CONVENIENCE: Quick set-up & teardown. Lightweight, durable products.

5 Insert lining peg into ground socket.

6 Attach string to lining peg and extend to next point. Now you can paint lines. Remove lining peg and string upon completion.

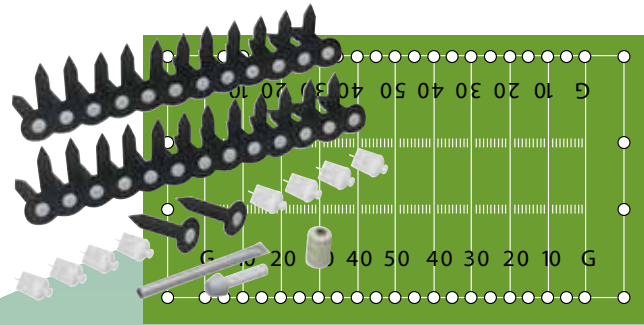

7 Insert Game Day flags or pylons

8 Insert plugs into all empty sockets.

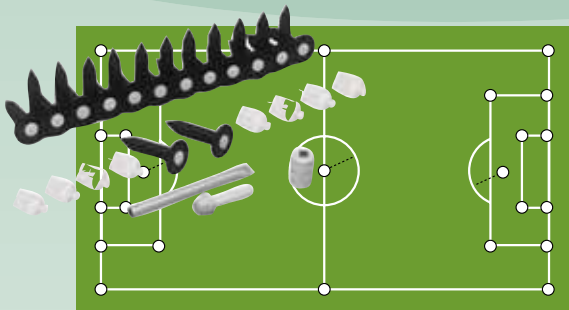

BUILD YOUR OWN CUSTOMIZED MARKING SYSTEM
